Description

For an engine of its size, the HondaGXH50 engine is surprisingly adaptable, and can be used to power a range of different products. Agricultural equipment and Construction & Industrial Equipment are just some of the products that get their power from the GXH50. And the fact that one of Honda's own Water Pumps is powered by the Honda GXH50 Mini 4-Stroke engine is a testament to the durability and reliance that can be placed on this little upstart.

Features

The HondaGXH50 engine uses a precision camshaft to form part of Honda's world-famous OHV design for increased efficiency and optimal power transfer. It features a High compression ratio for better fuel efficiency than comparable engines, so the HondaGXH50 Mini 4-Stroke engine will end up lighter on your pocket in the long run. With a large fuel tank, oil alert, easily accessible spark plug, and high quality materials, fit and finish, it's a proven performer.

Smooth Performance

The Honda GXH50 engine incorporates a Ball Bearing-supported crankshaft for greater stability, and its precision engineered components result in low vibration levels. A large capacity, multi-chamber exhaust system and sophisticated air intake system equate to exceptionally quiet operation. And a forged steel crankshaft and rigid crankcase, and the light weight, noise-reducing materials that are used throughout, reduce mechanical noise for easy use.

3 Year Warranty

All 4-Stroke Engines are covered by Honda's 3 Year Warranty. A network of over 400 authorised Honda dealers around Australia are also on hand to give you help should you run into any trouble. But with a heavy duty recoil starter and automatic mechanical decompression system, the offer of a spark arrester (optional), and genuine Honda parts throughout, the chances of the HondaGXH50 Mini 4-Stroke engine letting you down are pretty slim. Pretty slim indeed.

Specifications

MODEL GXH50

TYPE 4-stroke, overhead valve, single-cylinder, horizontal shaft

BORE & STROKE 41.8 x 36.0 mm (1.65 x 1.42 in)

DISPLACEMENT 49 cm³ (2.99 cu in)

COMPRESSION RATIO 8.0:1

NET POWER 1.6kW (2.1HP) at 7,000 rpm

MAXIMUM NET TORQUE 2.7 Nm (2.0 lbf ft) at 4,500 rpm

IGNITION SYSTEM Transistorised magneto ignition

STARTING SYSTEM Recoil Starter

COOLING SYSTEM Forced-air

PTO SHAFT ROTATION Counter-clockwise (from P.T.O. side)

FUEL CONSUMPTION AT RATED POWER 0.91 L/h at 7,000 rpm

RECOMMENDED FUEL Unleaded

LUBRICATION SYSTEM Forced splash

RECOMMENDED OIL 10W/30 API SG

OIL CAPACITY 0.25l

FUEL TANK CAPACITY 0.77l

DIMENSIONS 225 x 276 x 353 mm

DRY WEIGHT 5.5kg

OTHER SPECS Ideal replacement for small 2 stroke engines

RRP AUD \$676.83 (includes GST)
