Description

With its ultra-quiet Honda 4-Stroke engine, the Honda HHB25 Blower makes the uncomfortable vibration and ear-piercing wail of the 2-Stroke obsolete. You'll never go back!

Unlike its 2-Stroke rivals the Honda HHB25 Blower runs on unleaded fuel so you'll never have to mix oil and petrol again. Superior engineering means the HHB25 produces less noise and smoke than its competitors, and with its ultra-compact, lightweight design, this bad boy is easier to handle and will keep you working longer with less fatigue - perfect for commercial applications.

Lightweight & Efficient

With a lightweight design and fatigue-free throttle cruise control, the HHB25 makes your job easy whether you rely on it for an income, or as a weekend warrior.

The HHB25 offers quick power via a highly responsive accelerator pump, and provides a wind velocity of 70m/sec - that's 252km/h!

Throwing out air volume of 630m³/h, it also delivers improved safety and performance due to a unique anti-suction fan cover. Optional round nozzle also available.

Technology

The HHB25 draws its effortless power from its GX25, mini 4-Stroke engine with throttle cruise control.

With Honda's famous one pull easy start system, the Blower is designed to start first time, every time - year after year after year, for the life of the Blower.

And Honda's engineers have designed the HHB with added comfort in the form of a vibration isolating handle with rubberised hand grip.

Warranty

Honda backs up the HHB25 with a 4-year Domestic Warranty, or, if you're using it in a commercial application, a 12-month Commercial Warranty.

It's also backed by Honda Australia's network of 400+ authorised dealerships around the country.

From east coast to west, there's a Honda Power Equipment dealer waiting to help you out with any servicing or maintenance you need.

Specifications

ENGINE GX25

DISPLACEMENT 25cc

DIMENSIONS (LxWxH) 965 x 265 x 370
