Description

Boasting the latest in Honda's ultra-compact, lightweight, 4-Stroke engines, Honda's UMK425 Loop Brushcutter offers superb power and more torque than ever before.

Honda leads the world with revolutionary mini 4-Stroke engines that deliver more power and use less oil than 2-stroke alternatives. The UMK425 Loop is powered by Honda's new Generation II GX25 Mini 4-Stroke engine delivering commercial-grade power.

And with its auto-decompression, electronic ignition and anti-flood primer system, the UMK425 Loop will start first time, every time, year after year. It's what you've come to expect from Honda. NO MORE MIXING

The UMK425 Loop Brushcutter runs on unleaded fuel, so you'll never get your hands dirty having to mix oil and petrol again just to get the thing going!

Superior engineering means the UMK425 Loop will produce less noise and smoke, making it environmentally friendly - and easy on your body.

And you'll save money on 2-Stroke oil, compared to competitors. Especially relevant to commercial operators, why wouldn't you want a product that maximises your profits? HONDA TECHNOLOGY

The UMK425 Loop Brushcutter features full 360° "any-side-up" operation, so you can use and store it in any position.

It delivers excellent torque and performance via an all-new Generation II, GX25 4-Stroke engine.

And user comfort is uncompromised too, with the UMK425 Loop handle featuring a comfortable solid drive shaft with unique anti-vibration engine mount. SPECIFICATIONS

ENGINE GX25

DISPLACEMENT 25cc

BORE AND STROKE 35 x 26mm

MAXIMUM POWER OUTPUT 0.81W (1.1hp) @ 7000rpm

MAXIMUM TORQUE OUTPUT 1.25N.m @ 5000rpm
