Description

Honda have developed the world's lightest 3kVA class generator, with theEU32iweighing just 26.5kg.The start functionality has been simplified to provide an ease of use operating interface, giving the ability to start with two simple steps - just turn the switch and pull the cord.

TheEU32iis an incredibly versatile generator with intelligent design that makes it easy to use, start and carry. Seamless Connectivity

This intelligent generator has its own smartphone app which uses Bluetooth to connect to your Android or iOS smartphone. The Intuitive App Control allows you to check the fuel level, access power output, control Eco Throttle and even activate a remote stop.

The app allows the capability to monitor several machines, and switch between generators, at the touch of a button. You will also be notified of any operating warnings and key service information.Increased Fuel Efficiency

The newly developed, high-performance engine is the first generator of its kind to include built in fuel-injection to optimise fuel use. The Eco Throttle allows the generator to automatically adjust engine speed to provide the correct amount of power required.

By improving the fuel efficiency, continuous operation time is ensured with low fuel consumption.3200 Watts AC Power Output

The 3200 watts AC power output provides immense power that can be relied upon for everyday and professional activities, or for the occasional emergency use.

The world's first 'high-output' generator with 3.2kVA, that can satisfy multiple loads, including RV air conditioners and microwave ovens. A highly dependable power supply that you can trust to continually perform when you need it. Cleverly Designed Interface

The interface has been cleverly designed to provide a simplified control panel that is easy to use. Every element is clearly shown on the front panel from the on/off settings and status lights to the Eco Throttle and circuit breakers.

The Premium Intelligence Design offers a unique shape with the risk of damage during transport reduced by eliminating the four corners.Dimensions, Weights and Capacities
