## Description

Specifically designed for home-use power equipment applications, the HondaGC160 engine provides an ideal source of power for a variety of consumer products. Tillers/Cultivators, Pressure Washers, Agricultural Equipment and Water Pumps can be found around Australian homes, powered by the HondaGC160 engine. Accredited Honda OEM (Original Equipment Manufacturers) use the HondaGC160 engine, so you know that it's a reliable product. Fuel Efficient, High Output Operation

The HondaGC160 engine features a compact combustion chamber, overhead cam design, and uniblock construction to reduce fuel consumption. Powerful torque across a wide RPM range helps reduce engine speed drop from sudden load increases. And by incorporating an easily accessible spark plug and oil drain & fills, as well as a proven lifetime timing belt design, the HondaGC160 engine is easy to use and maintain. An Overall Performer

The lightest engine in its class, the HondaGC160 engine features the world's first general purpose engine internal timing belt, which provides quiet operation. Valve train and gear noise is minimised, and it features a tough resin overhead cam for better durability and quietness. And with a charcoal canister built into the fuel cap and without the need for a catalyst, the HondaGC160 engine is Emissions Compliant (contact Honda for more info). 2 Year Domestic Warranty

The HondaGC160 engine is covered by a Honda 2 Year Domestic Warranty, to give you peace of mind wherever you might be operating it. And, of course, if anything should happen while the Honda GC160 engine is working hard, there's a network of 450+ authorised Honda dealers across Australia who will be happy to help you out of a jam. So put it to the test; the HondaGC160 engine will deliver the power and reliability synonymous with Honda. Specifications

### MODEL GC160

TYPE 4-stroke, overhead cam, single-cylinder, horizontal shaft

BORE & STROKE 64 x 50 mm

DISPLACEMENT 160 cm<sup>3</sup>

COMPRESSION RATIO 8.5:1

NET POWER 3.4kW (4.6HP) at 3,600 rpm

CONTINUOUS RATED POWER 2.9kW (3.9HP) at 3,600 rpm

MAXIMUM NET TORQUE 9.4 Nm at 2,500 rpm

IGNITION SYSTEM Transistorised magneto ignition

STARTING SYSTEM Recoil Starter (electric optional)

COOLING SYSTEM Forced-Air

PTO SHAFT ROTATION Counter-clockwise (from P.T.O. side)

FUEL CONSUMPTION AT RATED POWER 1.5 L/h at 7,000 rpm

RECOMMENDED FUEL Unleaded

LUBRICATION SYSTEM Splash

RECOMMENDED OIL 10W/30 API SG

OIL CAPACITY 0.58l

FUEL TANK CAPACITY 2.0l

DIMENSIONS 329 x 369 x 331mm

DRY WEIGHT 11.5kg
