Description

The gutsy, ultra-lightweight GX35 Mini 4-Stroke efficiently delivers the kind of powerful, quiet performance that you'd expect from a larger engine – but in a very compact package. The GX35 is used by commercial gardeners and groundskeepers the country over. Used to power lawn & garden equipment, it's also well-known for powering Tillers/Cultivators, Water Pumps, Agricultural Equipment and Construction/Industrial Equipment. Advanced Technology

The world's lightest OHC engine, the Honda GX35 engine requires no fuel/oil mixing, and runs at approximately half the operating cost of comparable 2-stroke engines. A full 360° "any-side-up" operation means you can use and store the Honda GX35 engine in any position, and take advantage of the exclusive rotary-slinger lubrication system. The carburetor is equipped with an accelerator pump for fast, easy acceleration, and an efficient port configuration and large diameter valves maximise power output. Proven Reliability

An exhaust decompression system and unique low inertia design means the Honda GX35 engine will start first time, every time. There's an easily accessible spark plug, and it's simple to drain and re-fill the oil, so maintenance is a piece of cake. High quality materials, fit, and finish ensure that your Honda GX35 engine can be relied upon whenever you need it. 3 Year Warranty

The Honda GX35 engine, like so many other Honda Engines, is covered by a comprehensive Domestic & Commercial 3 Year Warranty. Special designs for horizontal and vertical applications are also available, so whatever your application, the Honda GX35 engine will deliver. And you're backed up by over 400 authorised Honda dealers around Australia who are on call to support you if you need repair, maintenance or parts assistance. Specifications

MODEL GX35

TYPE 4-stroke, overhead cam, single-cylinder, horizontal shaft

BORE & STROKE 39 x 30 mm (1.5 x 1.2 in)

DISPLACEMENT 35.8cm³ (2.2 cu in)

COMPRESSION RATIO 8.0:1

NET POWER 1.0kW (1.3HP) at 7,000 rpm

MAXIMUM NET TORQUE 1.6 Nm (1.2 lbs ft) at 5,500 rpm

IGNITION SYSTEM Transistorised magneto ignition

STARTING SYSTEM Recoil Starter

COOLING SYSTEM Forced-air

PTO SHAFT ROTATION Counter-clockwise (from P.T.O. side)

FUEL CONSUMPTION AT RATED POWER 0.71 L/h at 7,000 rpm
