## Description

Honda's V-Twin range of engines are the cream of the crop, powering Pressure Washers, Water Pumps and Commercial Lawn & Garden Equipment across Australia. The HondaGX660 V-Twin engine can also be found in Tillers/Cultivators and other Agricultural Equipment, Generators and in many different applications. And if it's something more hardcore that you need power for, the HondaGX660 V-Twin engine is also used in the Forestry and Construction/Industrial industries. Fuel Efficiency at its Best

The fuel economy of the HondaGX660 V-Twin engine is similar to fuel injection, with the simplicity of carburetion ensuring that running this unit is easy on both your pocket and the environment. It features a digital CDI ignition system with variable timing, as well as a forged steel crankshaft and insert style rod bearings for efficient operation. There's also a rev limiter to protect against damage from over-revving. A hemispherical combustion chamber delivers rapid combustion, and it features Pressure fed crankshaft bearings. Add a two barrel inner-vent carburetor for more precise fuel metering and a 9.3:1 compression ratio, and you'll be generating high power output without the need for premium fuel. Proven Reliability

The HondaGX660's high capacity pump facilitates consistent oil delivery, and a handy Oil Alert will keep you posted if you look like running dry. There's a dual cylindrical air filter, and a large diameter air intake on board for superior cooling. The result is a long-lasting, high-performing and reliable engine. 3 Year Warranty

Don't forget, all Honda V-Twin Engines are covered by a Honda 3 Year Domestic & Commercial Warranty. Honda has a network of over 400 authorised dealers around Australia, so should you need parts, accessories, or maintenance done, you're not alone. You can work your HondaGX660 V-Twin engines hard as you want. It's built to last.

### Specifications

MODEL GX660

TYPE Air cooled 4-stroke OHV petrol engine, 90° V-twin design, horizontal shaft

BORE & STROKE 72 / 78 x 72 mm

DISPLACEMENT 688cm<sup>3</sup>

COMPRESSION RATIO 9.3:1

NET POWER 16.0 kW (21.5 HP) / 3 600 rpm

CONTINUOUS RATED POWER 11.0 kW (14.8 HP) / 3 000 rpm 12.5 kW (16.8 HP) / 3 600 rpm

MAXIMUM NET TORQUE 48.3 Nm / 4.93 kgfm / 2 500 rpm

IGNITION SYSTEM Digital CDI with variable ignition timing

STARTING SYSTEM Electric starter

FUEL CONSUMPTION AT RATED POWER 6.3 L/hr - 3 600 rpm

RECOMMENDED FUEL Unleaded

LUBRICATION SYSTEM Full-pressure

OIL CAPACITY 1.9l

FUEL CAPACITY n/a

DIMENSIONS 429 x 410 x 438 mm (T-Type)

DRY WEIGHT 44.6kg
