•

Domestic push mower

•

21" Steel deck

•

Engine Brake with GCV170 Honda engine

•

Honda MicroCut® Twin blades

•

3 in 1 Clip Director system - Mulch, Catch or Discharge
Enhance Your Mowing Experience

The grass is certainly greener when you have the right mower on your side and the brand newHRN216PKUis ready to enhance your mowing experience. Fully equipped with power and torque, the all newHRN216PKUengine brake push mower will give your garden the perfect finish.Overview

The all-newHRN216PKUmower offers a powerful new GCV170 engine, rugged design and is packed with features that provide an easy, comfortable mowing experience and the smooth, groomed finish lawn enthusiasts aspire to.

Judging by the sound of the new GCV170 engine, it will be perfect to tackle thick, heavy grass as it delivers another level of power and torque. Music to the ears of those who know the struggles of lugging a gutless mower around the yard in the hot summer sun.

Maintenance is also a breeze with theHRN216PKUas it offers a larger than most fuel tank spout, easier oil changes and reliable, dependable starting and re-starting.

Under the deck, features precision-crafted blades with the exclusive Honda Twin Blade MicroCut System® for exact cutting and fine mulching at any height. Finer grass clippings make better mulch and, when bagged, take less capacity in the grass catcher.New GCV170 Engine

More power and torque relate directly to the ability of the machine to tackle tough mowing conditions while still producing the clean, even cut prized by people who care for their lawns. More torque means more force is being delivered to the blades, which results in easier and faster cutting—especially in heavy, thick grass where stalling can

Disclaimer

occur. The power and torque of the new Honda GCV170 engine also provides more stable RPMs for greater consistency in cutting, mulching and bagging across a variety of lawn conditions.Auto Choke Easy Starting

No engine choke required! Just start the mower and go! The new Honda GCV170 engine includes the exclusive Honda Auto Choke™ system. With a simplified structure and fewer parts, this user-friendly system is automatic, eliminating levers and cables. The engine starts easily, whether cold or hot, and is ready for immediate mowing. Once the engine is running, the Auto Choke automatically returns to an optimal operating position. The Honda GCV170 engine also features the Honda exclusive CycloFlow™ design, which produces increased turbulence in the cylinder and more stable combustion, resulting in easy starting and greater resistance to lower quality fuel.Heavy Duty 21" Steel Deck

The 21-inch curvilinear mower deck, designed for optimized airflow, is composed of heavy-duty steel to stand up to the most rugged conditions. The deck has been designed to produce an efficient path for grass clippings to pass into the catcher or onto the ground when mulching. The efficient pathway improves bagging and mulching, preventing grass clippings from clogging.Micro Cut Twin Blades System

Under the deck, the newHRN216PKUfeatures precision-crafted blades with the exclusive Honda Twin Blade MicroCut System® for exact cutting and fine mulching at any height. Finer grass clippings make better mulch, and, when bagged, take less capacity in the grass catcher. The result is fewer trips to empty the catcher. For even greater durability, the front wheels have been reconfigured to a simple single axle, and nut and bolt connections are made of steel and embedded in resin.3 in 1 system with Clip Director®

This clever system is offered in theHRN216PKU. Simply slide the Clip Director for mulching, bagging, or discharging versatility. No attachments required.

Located on the side of the engine cowling controls an entry shutter between the lawn mower deck and the grass catcher, allowing the operator to easily:
- Mulch 100 percent of clippings
- Bag 100 percent of clippings
- Rear discharge

The operator can easily select either mulching or bagging options without the tools or attachments required on most conventional lawn mowers.Superior Mulching and Bagging

You'll achieve superior cut quality whether you're mulching or bagging, even in tough mowing conditions. Plus with a 66L grass catcher, you can keep mowing for longer without having to stop and empty so frequently.Dual Level Height Adjustment System

With just two levers, the operator can make quick and convenient adjustments for seven different cutting heights, making it fast and easy to take a little off the top, make a deep cut or mow at standard maintenance heights.Easy Maintenance

The HondaHRN216PKUis designed to make quick work of grooming grass, leaving more free time for the operator and ensuring low maintenance is key! The wide fuel spout along with an elevated oil spout makes it easy to fill with fuel or change the oil—reducing the potential for spillage. The design also features a smart engine layout with easy access to the spark plug, an optimized air cleaner that can be changed without tools.8" High Traction Wheels

The HRN wheels offer excellent traction in a variety of mowing conditions. The large wheels will tackle rough and tough conditions with ease and they will last and last.Specifications
