With cordless battery technology, uncompromising cutting performance and a robust build quality, they’re a clear-cut favourite for a better-looking lawn. The all new HRG466 Battery comes equipped with all you need with a quiet, clean and powerful performance.

-

Domestic Self Propelled Mower

-

18" Steel Deck

-

36v Battery powered 1800w 3-Phase brushless motor

-

Catch, Discharge or Mulch via Versamow system

-

27kg (excl Battery)

-

Skin only. Battery & Charger sold separately
Battery Powered

Honda’s new battery-powered izy-ON HRG466 mower is cleaner than you think. As well as being zero-emission and boasting quiet running, there’s no need for handling petrol and a starter cord. Operating via a 3-Phase Brushless 1800w motor, get optimum performance for that Honda finish through the power of Honda’s Thermo-Smart universal battery range.Versamow® Selective Mulching Function

The Honda izy-ON HRG466 is the first battery-powered mower to offer Versamow® selective mulching. This efficiently cuts the grass into ultra-fine particles, recycling them back into your lawn to create a natural fertiliser for a healthier lawn. With the option to bag or mulch, you have the best of both worlds with Honda’s izy-ON HRG466 Self-Propelled battery mower.Powerful

The lithium-ion battery range developed for our new izy-ON HRG466 powers a brushless motor that is both high powered and highly efficient, ensuring that the battery’s energy goes as far as possible. Together, the pair propel the cutting blade to up to 2800rpm and – significantly – maintain that speed, ensuring no loss in cutting performance over an operating cycle.Universal Battery System

Powered by Honda’s Universal Battery System, you can use either of the three available batteries: 4Ah, 6Ah and 9Ah across the HRG466 Lawnmower and Honda’s entire Battery product range. Ensuring the longest possible run time without compromising power, the Thermo-Smart technology continuously monitors the voltage and thermal performance of every cell.
